

Units 3 & 4, Drummer's Corner Peterhead

Aberdeenshire

Feasibility Study

- FG Burnett's Building Consultancy team were instructed to conduct a feasibility study to separate two units which were previously merged to generate interest in re-letting following advice to our client provided via our Management and Agency colleagues.
- Structural alterations, utility separation and general refurbishment requirements were assessed.
- A detailed report was then prepared and issued advising on the feasibility, cost implications and practicality of separating the units.
